

*The highly innovative fully automatic **Magic Comfort Plus** is Saeco's top of the line home machine. Designed in silver and black, it exudes a style and sophistication that is breathtaking. Its digital display will tell you at any time the actual mode and status of operation. Extra programmable functions allow you to change the language of the display, adjust the water temperature, use an additional rinsing cycle, do automated descaling, and numerous other features. The Magic Comfort Plus offers the high tech Rapid-Steam<sup>®</sup> feature, allowing you to froth and brew without waiting or changing the temperature of the water. After steaming or frothing the Magic Comfort Plus is immediately ready to brew coffee.*

*The Magic Comfort Plus, has been created and designed with the ultimate coffee connoisseur in mind. The Magic Comfort Plus is unique, sophisticated, and most importantly it makes the best possible espresso available in a fully automatic machine. The Magic Comfort Plus allows you to make coffee house style drinks right in the comfort of your own home. Relax, sit back, and enjoy this new luxurious fully automatic coffee machine, The Magic Comfort Plus.*

**Bullets:**

- Push a button: from bean to cup at the push of a button;
- 15-bar pressure: Automatic pump driven machine utilizing the best technology to extract the richest coffee aroma;
- Adjustable built-in conical burr grinder, with anti-gravel device and auto shut off;
- Saeco Opti-Dose<sup>®</sup>: Adjustable 6-9 grams doser to regulate the amount of ground coffee to brew and therefore the strength of the beverage;
- Three programmable beverage settings: the perfect coffee volume for your favorite cup, for single and double shots;
- Saeco Aroma System<sup>®</sup>: a programmed hot water injection into the freshly ground coffee, in order to soak the coffee and allow it swell up, immediately before the start of the brew cycle;
- Saeco Easy Clean System<sup>®</sup>: Patented exclusive Saeco brewing unit, easily removable for chemical-free cleaning;
- Rapid Steam<sup>®</sup> feature: no waiting time between brewing an espresso and frothing mil;
- Steam and hot water wand with Pannarello frothing device: for manual frothing or hot water dispensing;
- LCD display: easy access to operation/programming of machine settings, among which:
  - Eight different language options.
  - Individual coffee temperature settings for each cup size.
  - Automatic descaling cycle: pour the descaling solution into the water tank and let the machine do the rest.
- Pre-ground bypass coffee doser: highest flexibility in the selection of the coffee to brew;
- Bon Temp<sup>®</sup> heating surface: Controlled cup warming surface with elegant cup rail;
- Removable transparent 82oz water tank with handgrip;
- Swivel base for convenient rotation;
- Large, removable drip tray and waste box for quick, easy cleaning.

## Features and Benefits:

### **An Italian Barista At your fingertip:**

Fancy a coffee? Push a button! By doing so, the machine will automatically grind the right amount of coffee, tamp it, brew it and dispense the used grounds into a dump box.

### **Pump System:**

The Magic Comfort Plus features a powerful pump rated at 15 bars (217.6 psi) of pressure. The Italian coffee making tradition requires steady pressure to produce first class espresso and coffee. Only in such a way can the water plow through the finest coffee grounds, for the perfect extraction.

### **Conical Burr Grinder:**

The Magic Comfort Plus has a built-in conical burr grinder with eight different levels of grinding (0-fine, 8-coarse). Each burr is made of high quality tempered steel, which is meant to last the lifetime of the machine with little maintenance. The coffee bean hopper holds ½lb bag of whole beans.

### **Saeco Opti-Dose® Adjustable**

#### **Dosing feature:**

The Opti-Dose® system will allow you to change the amount of ground coffee used for each beverage from 6 to 9 grams. By adjusting the amount of ground coffee you will be able to change the flavor and taste of your coffee, from weak to strong, without changing the amount of water used to brew the coffee.

### **Programmable beverage Volume:**

The Magic Comfort Plus is designed with three programmable brew buttons. To program, simply push one of them and hold it until you have the desired amount of espresso in your cup, then release the button. From that point on the machine is pre-programmed to dispense the same amount of espresso each time you press the same button. If you want a double espresso, just push the button twice and the machine will automatically brew two shots of espresso.

### **Adjustable Cup Dispensing Head:**

The dispensing head can be easily raised or lowered to adapt to your size cup. Small 4 oz espresso cups up to large 8oz coffee mugs can fit easily under the adjustable dispensing head.

### **Aroma System® Pre Infusion Makes Great Espresso:**

Thanks to this feature, it is possible to taste the full aroma of the coffee beans in every cup. A special programmed pre-brewing cycle injects a little hot water into the freshly ground coffee. This step allows the coffee to soak, and swell up. By moistening the grounds it maximizes flavor extraction to increase the crema of your espresso. The result: A superior cup of espresso or coffee with thick rich crema.

### **Saeco Easy Clean System®:**

The heart of the Magic Comfort Plus: the patented removable brewing unit. This is the device that allows the machine to work automatically. Here is where the coffee extraction takes place. The patented brewing unit can be extracted at the push of a button, for convenient rinsing and chemical free cleaning. The brewing unit is exclusive proprietary Saeco technology and one of the things that has made Saeco world leader in fully automatic coffee machines.

### **Rapid Steam®:**

The Rapid Steam® feature allows you to steam or froth milk with no waiting time after brewing your espresso. The Magic Comfort Plus heats water for coffee or generates steam in less than 10 seconds. Such technology provides long running steam to froth milk as long as there is water in the water tank.

### **Steam and hot water wand with exclusive Pannarello frothing device:**

The Magic Comfort Plus has a steam wand located on the front of the machine, which will also produce hot water for tea or any other hot water based drinks. To release water from the steam wand simply push the programmable instant hot water button on the control panel. The Pannarello allows easy frothing and perfect foam with no hassle

- LCD display:** Easy access to programming of machine settings, among which:
- Automatic rinsing cycle;
  - Water hardness programming: test the hardness of the water with a test strip, communicate it to the machine and it will tell you when it is the right moment to decalcify the unit;
  - Adjustable temperature control: a special feature of the Magic Comfort Plus is the ability to set each individual cup setting with its own unique temperature. Five different temperatures are available: Maximum, High, Medium, Low and Minimum;
  - Eight different languages to choose among;
  - Automatic descaling cycle: pour the descaling solution into the water tank and let the machine do the rest;
  - Shut off timer.

**Pre-ground Bypass Doser:** Need a decaf coffee? Fret not, because the pre-ground bypass allows you to use pre-ground coffee. You can brew decaffeinated or flavored coffee without having to change the beans in the bean hopper. This feature is a must for any type of commercial environment that wants to offer a variety of coffee drinks.

**Bon Temp® Heating Surface:** Stack your porcelain cups on this large and convenient heating surface. Pre-heated cups help to retain the crema and let the aromas develop.

**Removable Water Reservoir:** The Magic Comfort Plus makes it easy to refill the water reservoir by allowing you to add water while still on the machine, or by removing the reservoir with the easy grip handle. The reservoir is made of clear ABS plastic, which allows you to see how much water is remaining in the tank. When the reservoir runs out of water, the LCD will indicate that the water reservoir needs to be filled. The machine will stop brewing if it runs out of water.

**Swivel Base:** A swivel base has been placed on the base of the machine to simplify even further general maintenance and cleaning. The machine will turn from side to side with a light push so that there is no need to lift or move the machine itself.

**Internal Dump Box For used Coffee:** The dump box is where the machine stores the used coffee grounds. Once the dump box is full, the machine will inform you it needs to be emptied. The dump box is easy to remove and clean, just dump the coffee and clean with hot soapy water. Not dishwasher safe.

**Slide Out Drip Tray:** A single drawer slides out from the front of the machine. The drawer contains the cup tray and a drip pan. Made of durable plastic, it cleans easily in soap and water. Not dishwasher safe.

**Accessories Included:** Cleaning brush for coffee grinder, brew group maintenance kit, instruction manual and video.

**Product Specifications:**

UPC:	7 08461 03046 7
Color:	Silver and Black
Body:	ABS Plastic and Steel Frame
Warranty:	12 months parts and labor
Power:	1250 watts – 120 volts – UL listed
Weight:	Machine: 29 lbs Box: 36 lbs
Size:	Machine: 15.5” H x 13” W x 16” D Box: 18” H x 21” W x 15.25” D
Origin:	Italy
